Introduction to Final Report Spreadsheet

Congratulations on successfully completing your DERA State Program grant! A final report is one of the requirements to complete and close out your FY 2008 through FY 2011 DERA State Program grant.

The Final Report has 2 parts; Part 1 is a Narrative portion (please see Project Narrative tab), and Part 2 the Project Fleet Description Spreadsheet (please see Fleet Description tab). This template may be slightly different than the version you have been using for your quarterly reports. However, it includes all required information on your fleet. In order to ensure that all required final information is reported, you have two options for completing the Final Project Fleet Description:

Option 1: You may enter or copy the information on all cumulative vehicles involved in your project from previous quarterly Project Fleet Description Spreadsheets into this document. Please note that there are most likely additional columns in this spreadsheet that will also need to be filled in for your vehicles, such as the fiscal year funding.

Option 2: If your last quarterly Project Fleet Description Spreadsheet contained all cumulative vehicles involved in your project, you may use that spreadsheet as your Final Project Description Spreadsheet, provided that all information in this Final State Program Report Template is included and any new columns are added to your spreadsheet. Please pay special attention to information required for upgrades, replacements and repowers, as described below.

The spreadsheet is divided into three sections: Recipient Information, Project Information, and Fleet Information.
Below is an explanation of each field.
For an example of how the Project Fleet Description spreadsheet should be filled out, please refer to the tab labeled 'Example'.

Recipient Information should only be filled out only once.

Project Information and Fleet Information should be filled out for each separate "project" within the grant.

Separate projects are generally defined as separate subgrants to various entities, or separate, distinct target fleets within the grant or subgrants.

Fleet Information should be cumulative, and include all affected engines, vehicles, and retrofits under the project, as of the end of the current Reporting Period.

Column/Row	Recipient Information	
	Organization/ Grantee Name-	Enter the name of the organization receiving the grant from EPA (regardless of who actually uses the funds).
	First Name-	Enter the FIRST name of the contact person for the grant.
	Last Name-	Enter the LAST name of the contact person for the grant.
	Job Title-	Enter the Job Title of the contact person for the grant.
	Email Address-	Enter the email address of the contact person for the grant.
	Address-	Enter the address of the contact person for the grant.
	City-	Enter the city of the contact person for the grant.
	State-	Enter the two letter postal code of the contact person for the grant.
	Zip Code-	Enter the zip code of the contact person for the grant.
	Office Phone-	Enter the phone number of the contact person for the grant.
	OfficePhoneExt-	Enter the extension of the contact person for the grant (if applicable).

	Project Information	
	Project Name-	Enter the name of the project (try to include both the Organization Name and Fleet(s)).
	Organization Performing Project-	Enter the name of the entity performing the project (this could be the EPA Recipient or a Subgrantee).
	Target Fleet-	Select from the dropdown menu provided the target fleet to be addressed.
	Number of Vehicles-	Enter the number of vehicles to be addressed.
	City-	Enter the city in which the project will take place.
	County-	Enter the county in which the project will take place.
	State-	Enter the two letter postal code for the state in which the project will take place.
	Region	Enter the EPA Region
	Funding Amount -	Enter the total amount of Federal funds to be committed to the project
	Additional Funding Source-	If there are to be matching funds, enter the source.
	Additional Funding Amount	Enter the amount of funds provided.
	Public Benefit -	If the vehicles are part of a public fleet or benefit the public (i.e. a private school bus company contracted by a public school; drayage vehicles that serve a port; private construction equipment contracted to a public works project, etc)
		enter "yes", otherwise enter "no".

	Fleet Information	
	Vehicle Type-	Enter the vehicle type, either "On Highway" "NonRoad".
	Target Fleet-	Select the target fleet from the dropdown menu.
	Class/Equipment-	Select from the dropdown menu the Vehicle Class or type of nonroad equipment.
	Vehicle Count-	Enter the number of vehicles that fall under this Vehicle Class or type of nonroad equipment.
	Engine Make-	Enter the manufacturer of the existing Engine.
	Engine Model-	Enter the model of the existing Engine.
	Engine Model Year-	Enter the model year of this engine set.
	Horsepower-	For NONROAD ONLY, Enter the average horsepower of the equipment.
	Current Tier Level-	For NONROAD REPLACEMENTS, REPOWERS AND UPGRADES ONLY, Select from the dropdown menu the Current Tier Level.
	Current Standard Level -	For NONROAD AND ON-HIGHWAY REPLACEMENTS, REPOWERS AND UPGRADES ONLY, enter the current emission standard levels of the engine for PM and NOx or NMHC+NOx.
	Current Fuel Type-	Select the type of fuel that is currently being used (prior to any clean diesel activity change).
	Amount of Fuel Used-	Enter the amount of fuel used in gallons for all vehicles in the row (i.e. if the Vehicle Count is 2 and each vehicle uses 2,000 gallons/year, enter 4,000).
	Annual Miles-	For ON-HIGHWAY ONLY, Enter the average number of vehicle miles traveled per year per vehicle.
	Annual Usage Rate Hours-	For NONROAD ONLY, Enter the average number of hours the equipment is used per year.
	Annual Idling Hours-	For ON-HIGHWAY ONLY, Enter the average number of hours the vehicle idles per year.
	VIN/Serial # -	For Repower and Vehicle Replacement Projects, Enter the VIN or engine Serial # for each scrapped/replaced vehicle or engine.
	Year of Retrofit Action-	Enter the year in which the retrofit will take place (i.e., if in 2010, you're replacing a 1995 bus with a 2007 bus, the retrofit year is 2010.)
	Technology Type-	Enter the type of technology to be used. Example: Diesel Particulate Filter, Replacement, Biodiesel 100
	Technology Make-	Enter the make of the technology. Example: Donaldson, Caterpillar.
	Verified Technology Model-	Enter the model of the technology as identified on the EPA/CARB verification lists (i.e. Johnson Matthey ACCRT, Carrier Transicold - Comfortpro, etc.) to confirm a verified technology was used. This is applicable for exhaust retrofits, upgrades, idle reduction technologies, aerodynamics and low rolling resistant tires. Verified Technology Model may not be known for the initial application, pending the bid process, and would be noted as TBD.
	New Engine Model Year-	For REPLACEMENTS AND REPOWERS ONLY, Enter the model year of the new vehicle/engine.
	New Tier Level-	For NONROAD REPLACEMENTS, REPOWERS AND UPGRADES ONLY, Select from the dropdown menu the new Tier Level.
	New Standard Level-	For NONROAD AND ON-HIGHWAY REPLACEMENTS, REPOWERS AND UPGRADES ONLY, enter the new emission standard levels of the engine for PM and NOx or NMHC+NOx.
	Annual Idling Hours reduced-	For IDLE REDUCTION STRATEGIES ONLY, Enter the average number of idling hours reduced for the engines in this row.
	Technology Unit Cost-	Enter the dollar amount of the technology per unit.
	Technology Unit Installation-	Enter the cost of installing the technology per unit.

	Marine Vessels	
	Sector-	This field will always read marine.
	Application-	Select the target vessel.
	Number of Engines per Vessel-	Enter the total number of engines on the vessel including auxiliary and propulsion. The max number of engines allowed per vessel is 5.
	Engine Type-	Identify which engines are propulsion and which are auxiliary.
	Number of Engines-	Enter the quantity of propulsion and the quantity of auxiliary engines.
	Engine Model Year-	Enter the average model year of this group of engines in the row.
	Activity Level-	Enter the number of hours in operation.
	Horsepower-	Enter the average horsepower of the group of engines in the row.
	Annual Idling Hours per Engine-	Enter the average number idling hours for the engines in this row in a given year.
	Current Tier Level-	For REPLACEMENTS, REPOWERS AND UPGRADES ONLY, Select from the dropdown menu the Current Tier Level.
	Current Standard Levels-	For REPLACEMENTS, REPOWERS AND UPGRADES ONLY, enter the current emission standard levels of the engine for PM and NOx or NMHC+NOx.
	Displacement per cylinder	Select from the dropdown menu the displacement per cylinder in liters.
	Current Fuel Type-	Select the type of fuel that is currently being used (prior to any clean diesel activity change).
	Amount of Fuel Used-	Enter the amount of fuel used in gallons for all engines in the row (i.e. if the Vehicle Count is 2 and each vehicle uses
		2,000 gallons/year, enter 4,000).
	Year of Retrofit Action-	Enter the year in which the retrofit will take place (i.e. If in 2010, you're upgrading a Tier 0 engine to Tier 1, then the retrofit year is 2010)
	VIN/Serial # -	For Repower and Vehicle Replacement Projects, Enter the VIN or engine Serial # for each scrapped/replaced vehicle or engine.
	Technology Type-	Enter the type of technology to be used. Example: Diesel Oxidation Catalyst, Shore Power, Engine Repower, etc.
	Technology Make-	Enter the make of the technology. Example: Donaldson, Caterpillar.
	Technology Model-	Enter the model of the technology if available (i.e. Johnson Matthey PCRT).
	New Engine Model Year-	For REPLACEMENTS AND REPOWERS ONLY, Enter the model year of the new engine(s).
	Activity Level-	For REPLACEMENTS AND REPOWERS ONLY, Enter the activity level in hours per year per engine.
	Annual Idling Hours reduced-	For IDLE REDUCTION STRATEGIES ONLY, Enter the number of idling hours reduced as a result of this technology.
	New Engine Tier Level-	For REPLACEMENTS, REPOWERS AND UPGRADES ONLY, Select from the dropdown menu the new Tier Level.
	New Standard Levels-	For REPLACEMENTS, REPOWERS AND UPGRADES ONLY, enter the new emission standard levels of the engine for PM and NOx or NMHC+NOx.
	Technology Unit Cost-	Enter the cost of the technology per unit.
	Technology Unit Installation-	Enter the cost of installing the technology per unit.

Question	Answer
Please summarize the accomplishments that occurred during the grant period.	PA DEP performed an onsite inspection October 5, 2012, to confirm delivery and in-us Eight additional eGSE were delivered to US Airways at the Philadelphia International A Scrappage, with documentation, of 58 diesel GSE was completed by October 12, 2012 funds were distributed for the final eight vehicles but the delivery was required under th agreement between PA DEP and PHL/City of Philadelphia. Final reimbursement of $2 PHL/City of Philadelphia.
Provide a comparison of the actual accomplishments with the anticipated outputs/outcomes and timelines/milestones specified in the original project annual Work Plans.	Actual accomplishments matched anticipated outcomes. All project work was complete award.
If the anticipated outputs/outcomes and/or timelines/milestones from the original submitted proposal were not met, please explain why not. Did you encounter any problems during the grant period which may have precluded your from meeting the project objectives?	N/A
How did you remedy any problems? Please detail how and the date you had to address any problems that changed the original work plan and or work plan schedule.	N/A
Please identify the source of any cost-share or additional leveraged funds are reported for this grant period in Table 1 above.	US Airways and Philadelphia International Airport/City of Philadelphia Department of A
Was any program income generated during the grant period? Identify amount of program income, how it was generated, and how the program income was used.	No.
Did any public relations events regarding this grant take place during the grant period?	No.
Are you using websites or other tools used to relay information about this grant to the public?	http://www.depweb.state.pa.us

Provide a comparison of the actual accomplishments with the anticipated outputs/outcomes and timelines/milestones specified in the original project annual Work Plans.	HTF - All anticipated c purchasing additional Clean Textiles Systen Convoy Solutions, Inc workplan for this proje issues with getting ap is operational.
If the anticipated outputs/outcomes and/or timelines/milestones from the original submitted proposal were not met, please explain why not. Did you encounter any problems during the grant period which may have precluded your from meeting the project objectives?	Convoy Solutions, Inc issues with getting ap is operational.
How did you remedy any problems? Please detail how and the date you had to address any problems that changed the original work plan and or work plan schedule.	Convoy Solutions Inc.
Please identify the source of any cost-share or additional leveraged funds are reported for this grant period in Table 1 above.	HTF contributed matc $308,399.09. Convoy spent on the infrastru
Was any program income generated during the grant period? Identify amount of program income, how it was generated, and how the program income was used.	No.
Did any public relations events regarding this grant take place during the grant period?	No. Convoy Solutions tentatively scheduled

Are you using websites or other tools used to relay information about this grant to the public?	http://www.depweb.st

e Responses

Answer

c. (HTF) - $285,000. HTF submitted its final invoice and was reimbursed.
ns LP - $47,992. Clean Textiles submitted its final report and was reimbursed. A
DEP occurred on October 1, 2012. The new vehicles were put in service on
and the old diesel vehicles were scrapped according to EPA requirements.
. - $228,985. All grant requirements were completed prior to September 30, 2012.
npleted additional site construction at the Flying J in Carlisle that is outside the
reement. Electricity for the site was connected and the entire site is operational.
mitted three invoices and was reimbursed. Unspent funds were returned to EPA.

---

outcomes have been accomplished. The success of the project contributed to HTF
LNG fueled trucks without grant assistance from PA DEP.
ns LP - All anticipated outcomes have been accomplished.
. - All anticipated outcomes have been accomplished according to the revised
ect. Full operation of the truck stop electrification (TSE) system was delayed due to
propriate electric infrastructure installed. The issue has been resolved and the site

---

. - Full operation of the truck stop electrification (TSE) system was delayed due to
propriate electric infrastructure installed. The issue has been resolved and the site

---

worked with the electric provider to get the appropriate infrastructure.

---

hing funds totaling $2,165,360. Clean Textiles contributed matching funds totaling
Solutions contributed matching funds of at $228,982.55, in addition to any funds
cture that was outside of the scope of the grant.

---

s is planning a grand opening event for the TSE project. The grand opening is
for February 7, 2013.
